1 [ITiCSE 2005 working group reports: Development of XML-based tools to support user interaction with algorithm visualization](#)

 Thomas Naps, Guido Röbling, Peter Brusilovsky, John English, Duane Jarc, Ville Karavirta, Charles Leska, Myles McNally, Andrés Moreno, Rockford J. Ross, Jaime Urquiza-Fuentes
 December 2005 **ACM SIGCSE Bulletin**, Volume 37 Issue 4

Publisher: ACM Press

 Full text available: pdf(421.21 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

As a report of a working group at ITiCSE 2005, this paper represents a vision of the use of XML specifications and tools in algorithm visualization, particularly with regard to supporting user interaction. A detailed description is given of how an interesting event to be visualized is decomposed, combined with interactive questions, narratives, control flow code and metadata, and finally rendered into graphical primitive and transformation specifications. The heart of the paper is our discussion ...

Keywords: XML, animation, pedagogy, visualization

2 [Interacting with media: Shared interactive video for teleconferencing](#)

 Chunyuan Liao, Qiong Liu, Don Kimber, Patrick Chiu, Jonathan Foote, Lynn Wilcox

We present a system that allows remote and local participants to control devices in a meeting environment using mouse or pen based gestures "through" video windows. Unlike state-of-the-art device control interfaces that require interaction with text commands, buttons, or other artificial symbols, our approach allows users to interact with devices through live video of the environment. This naturally extends our video supported pan/tilt/zoom (PTZ) camera control system, by allowing gestures in vi ...

Keywords: collaborative device control, distance learning, gesture based device control, panoramic video, video communication, video conferencing, video-enabled device control

- 1 [Database and digital library technologies: A geolibrary for multimedia data sets: design and implementation issues](#)

Cláudio S. Baptista

March 2002 **Proceedings of the 2002 ACM symposium on Applied computing**

Publisher: ACM Press

Full text available: pdf(785.49 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This paper describes the design and implementation issues of the STepLib geolibrary. STepLib aims to manipulate both spatiotemporal and multimedia data. Currently, the STepLib model supports maps, still images, video, audio and documents, as first class objects. This allows not only for the support of storage and presentation capabilities, but also for indexing and searching of these complex data types. Metadata are used in the model to represent semantic abstraction of the underlying geo-object ...
